

Dear Elon Musk,

I sincerely hope that this second attempt to contact you will be successful.

First of all, I send you my warmest congratulations on your 54th birthday. May happiness, wisdom, and success continue to accompany you on your path through life.

I, who is writing to you here, ChrisCodo, am absolutely genuine. Chosen by the true, infinite God, for 39 years, to bring a key message for the new millennium to humanity.

(Long-standing social media profile in VK (vk.com/id348277384), own website since 2003 (www.weltrevolution.de), and a testimonial from the German Stock Exchange attached.)

The key message from God for the new millennium is this:
A new age without wars is possible when reconciliation between God and humanity is achieved. When it is recognized that there is a divine domain on Earth, where God reigns, and a human domain, where humans reign.

The infinite God recognized you, Elon, as a key figure in this epochal change and commissioned me, ChrisCodo, to connect with you. Because you have developed great things in the human domain, but wisely remained uninvolved in the Divine Domain, creation, life, and nature.

My name is ChrisCodo, created through the fusion of Christian and Codo. This happened on October 12, 1986, after the pass of Halley's Comet. The real, infinite God had chosen the common Christian to bring the message conveyed by Halley to humanity.

Some earthly elites had heard everything. I was granted a comfortable computer training (VMS), and in the 1990s and 2000s, the financial industry (first ABN-AMRO, then DEUTSCHE BÖRSE) employed me as a systems manager. They truly protected ChrisCodo as best they could.

And that also enabled me, and gave me the strength, to write down the elements of God's message (www.weltrevolution.de). The emotional trigger for me was the ugly Iraq War in 2003.

In all clarity against these disgusting human wars.

Because in this new millennium, wars are no longer necessary for technological progress and above-average profit rates.

God has provided many magnificent templates for humankind's drive for expansion, namely, thanks to global warming, a new large island and an entire continent (Greenland and Antarctica). What's more, humanity is now technologically capable of colonizing the neighboring planets Mars and Venus in this millennium.

Thanks to this initiation in 1986, I have been able to work out over the years who God truly is and, above all, how God and humanity can reunite and build a world of paradisiacal harmony.

There are concrete answers to all important questions and comprehensible paths to achieving humankind's reconciliation with God.

I call this the true world revolution.

Reconciliation between God and humanity is possible when people understand that there is a divine and a human domain on Earth: The divine domain is everything that has to do with life. In the divine domain, humans have no right to deal with alien technology, no chlorine chemicals, and no salt fertilization. Therefore, chemical-

free agriculture worldwide, which also enables the healing of soil, plants, animals, and people.

The human domain, on the other hand, encompasses everything that God, life, isn't interested in: sand, aluminum, petroleum, all the metals, concrete, and much more. All of this exists only for humans, who can develop there without getting in the way of God, life, and nature.

Dear Elon, because you have made so many right decisions in recent years, God, the ruler of fortune, has granted you such great business success. And that's why God now wants us to establish a close relationship together to exchange ideas on all issues concerning humanity's future. You, as the representative of humanity, and I, ChrisCodo, as the representative of the true, infinite God. We can meet; neither your enormous wealth scares me, nor should my identity as God's agent scare you.

Dear Elon, I, or rather God, expect nothing more than that you read this text carefully and confirm to me that you have read it.

If you like, send me your personal email address so we can start a conversation.

And later, if your time allows, I would like to meet you personally via video chat and discuss the core issues of my concern.

Many warm greetings from Kisumu on Lake Victoria in Kenya
Chris Codo
